

DLC: driveWheel3

This is the latest iteration of the driveWheel. Thanks to the the improved motor shaft connection design, you can now deliver more torque to the tracks when needed.

Assembly Instructions

You will need...

- 1x driveWheel3 hub
- 1x M3x10 screw
- 1x driveWheel3

Align and insert the hub so that you see the hole through the hole

my finger

the flat side of shaft must be
perpendicular to the screw
